FRANDSEN

Benny Frandsen
Founde of FRANDSEN GROUP

While the youth rebellion raged in the 1960s, 28-year-old Benny Frandsen, a newly trained electrician, was busy building lamps in his basement. In the beginning, the lamps were square, but the creative entrepreneur quickly discovered that what the Danes really longed for was round lamps. And so he designed the iconic Ball lamp in several versions for the floor, wall and table. This launched the young businessman's success as a lamp designer.

Today, the basement has long since been replaced with a large head-quarters in Horsens, central Denmark. From here, Frandsen Lighting sells functional lamps in modern, Scandinavian design all over the world, often in close collaboration with popular Danish designers. Our more than 40 years' experience of creating the perfect lamp is our customers' guarantee for high quality, functional lighting and – not least – beautiful design.

Frandsen Lighting A/S is part of the Frandsen Group, which also comprises Frandsen Project, supplier of unique design solutions for hotels, restaurants etc., and Verpan, manufacturer of a wide range of popular furniture and lamp designs by renowned Danish designer Verner Panton.

- Mounted with black fabric cord (120 cm / 47.2")
- Recommended bulb (not incl.) 7 x E26 LED max. 4W. We recommend to use only LED bulbs due to the low heat emission feature.
- Designer: Benny Frandsen

The electrician's round sensation

Determination pays. The Ball lamp would never have been created and sold to millions if it weren't for a determined, young electrician named Benny Frandsen who created prototype after prototype in the basement of his home in the Danish town of Skanderborg in the 60s. It was actually a sideline while serving in the military, but things changed when Benny Frandsen produced the Ball design in 1969.

The round lamp was introduced in a standard, wall-mounted and table lamp design, and especially the wall lamp, featuring a powerful magnet, was hugely popular. As Benny Frandsen raked in the design awards, Ball became an integral part of practically every home in Denmark. And today, most adult Danes have a special relationship with the little, round lamp.

"I've designed many lamps over the years, but Ball holds a special place in my heart. Apparently, many other people feel the same way, because today, 45 years after it was introduced, it's still our most popular design," says Benny Frandsen.

Trends in the early years dictated lampshades in orange, dark brown and polished aluminium. Since then, the iconic lamp has been produced in countless colours and metals, ensuring it always feels like a breath of fresh air in the modern home.

Cohen ø9.8"

- Metal pendant.
- **Available in glossy brass with black top and glossy chrome with black top**
- ø25 cm / 9.8"
- Mounted with 250 cm / 98.4" black fabric cord.
- Ceiling canopy: ø11 cm / 4.3" (same color as pendant)
- Recommended bulb (not incl.) E12 LED max. 4W. We recommend to use only LED bulbs due to the low heat emission feature
